The ieee-alphabetic bibliography style for biblatex*

Joseph Wright†

Released 2025-03-14

This package provides a style for biblatex which follows the guidelines of the IEEE but using alphabetic labels. The citation style is alphabetic and sorted by alphabetic label, title and year. The bibliography style follows the pattern of the official IEEEtran package (http://www.ieee.org/documents/stylemanual.pdf). The style should be loaded in the usual way

```
\usepackage[style=ieee-alphabetic]{biblatex}
```

The References section of this document demonstrates the format generated by the package using the `biblatex-ieee.bib` database of example citations.
